Unpopulated components on the board are for the optional "Improved dynamic offset" circuit:
N1 – C32 (shorted, bw pins 6 and 7) and R33 (not populated, pin 6 to GND)
N2 – C36 (shorted, bw pins 28 and 29) and R39 (not populated, pin 29 to GND)

The datasheet has separate VCT and GND buses which are combined into GND in this schematic

Values in parentheses are from the datasheet
